PROFESSIONAL SUMMARY

Data professional with experience in Data Engineering, Analytics and Machine Learning, including industry experience at CAT Technologies and teaching experience in Data Science and Data Analytics. Skilled in designing ETL pipelines, building analytical solutions with Python and SQL, and developing end-to-end data projects. Passionate about solving business problems through data-driven products and scalable data workflows. Currently seeking a Junior Data Engineer or Data Analytics opportunity in a product-oriented environment.

TECHNICAL SKILLS

PROGRAMMING & DATA:

Python, SQL (PostgreSQL, MySQL), Pandas, NumPy, PySpark

DATA ENGINEERING:

ETL pipelines, Airflow, Docker, PostgreSQL, MySQL

MACHINE LEARNING:

Scikit-Learn, XGBoost, K-Means, PCA, Time Series Forecasting

BUSINESS INTELLIGENCE:

Power BI, Tableau, Excel

VISUALIZATION:

Matplotlib, Seaborn

TOOLS & WORKFLOW:

Git, GitHub, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

DATA SCIENTIST & DATA ENGINEER | CAT TECHNOLOGIES (BPO)

Aug 2022 – Dec 2023

- Developed supervised and unsupervised machine learning models to support operational decision-making.
- Designed ETL pipelines for extracting, transforming and preparing business datasets.
- Performed exploratory data analysis, feature engineering and statistical analysis using Python and SQL.
- Automated recurring analytical processes, improving reporting efficiency.
- Built dashboards and business reports with Power BI.
- Collaborated with multidisciplinary teams to deliver scalable, data-driven solutions.

DATA ANALYTICS & DATA SCIENCE INSTRUCTOR | DESAFÍO LATAM

Mar 2024 – Present

- Teach Python, SQL, Machine Learning, Statistics and Data Visualization.
- Mentor students through end-to-end data projects using real-world business cases.
- Review technical assignments and provide individualized feedback.
- Help students develop practical analytical and problem-solving skills.

DATA SCIENCE INSTRUCTOR & MENTOR | ICARO

2022 – 2024

- Delivered courses on Python, SQL, Machine Learning, Deep Learning and Data Analytics.
- Developed practical exercises focused on solving business problems with data.
- Supported students throughout complete Data Science projects and technical mentoring processes.

LANGUAGES

SPANISH: Native

ENGLISH: Upper Intermediate (B2) – Professional Working Environment

SELECTED PROJECTS

DETECTION OF CHURN Python | Scikit-Learn | XGBoost | SHAP

Built an end-to-end churn prediction pipeline including data cleaning, feature engineering, model training and explainability using SHAP.

ETL AIRPLANE TICKETS Python | SQL | PySpark | Airflow | Docker

Designed a complete ETL workflow for airline ticket data, including ingestion, transformation, validation and automation of data pipelines.

CUSTOMER SEGMENTATION Python | PCA | K-Means

Developed an unsupervised learning workflow to identify customer segments and support data-driven marketing strategies.

FORECASTING Python | Pandas | Statsmodels

Built forecasting models for sales prediction and business planning using historical time-series data.

RECOMMENDATION SYSTEM Python | Collaborative Filtering

Implemented recommendation techniques to generate personalized product suggestions and improve user experience.

DATA QUALITY Python | Pandas | Scikit-Learn

Created reusable preprocessing pipelines including missing value treatment, outlier detection and feature engineering.

Portfolio: <https://yaninacarletti.github.io>

EDUCATION

CHEMICAL ENGINEERING National University of Córdoba (FCEfYN)

Strong foundation in mathematics, statistics, process optimization and analytical problem solving.
